

SALE AND INVENTORY SYSTEM

Sale and Inventory system is a local web application that can help to clear information between logistics, sale, accounting department. All user member in this web application are as below:

1. Admin (He/she can be sales admin) that can manage the all user accounts in system. Admin can edit recent account (staff name, staff email, change password, role of staff) and add new user account with staff information (from human resource) and conformable role ID. Admin use Staff email as user name and set up new password. Admin can see all user or staff information in system and can see the pending sale order to ask Sale manager to approve this sale order.
2. Accountant (he/she can be sales accountant) that can manage all customer information, product list, invoice. Accountant can create new customer matches with sales staff ID or edit recent customer matches with another sales staff ID. Accountant can make new product with selling price or edit selling price of recent product. When Logistics done the delivery goods to customer, accountant can create invoice and add invoice code for that delivery. Beside that, Accountant can see also the sale order, staff information, inventory, delivery.
3. Logistics that can manage all inventory of product and receipt new product to warehouse. Logistics can create new receipt with product name, quantity, lot number, production date and expiration date. After sale order is approved by sale manager, it will go to delivery that Logistics can see and update the delivery status. Logistics will consider goods in inventory to choose the suitable goods for each sale order by First In First Out. Logistics can see also staff information, Customer information, Product list (not selling price).
4. Sale executive can manage their sale order. Sale executive can create new sale order with customer name, product name, quantity, selling price, amount and delivery date. One sale order master can have one or more sale order detail correspond with one or more delivery date. After creation, sale order status is pending. Sale manager will see and approve it. If it is approval, it will come to delivery. Sale executive can see also customer information, staff information, product list and selling price, inventory, delivery, sale order and invoice.
5. Sale Manager have all the properties of sale executive and she/he can create sale order and approve sale order of sale staff. Sale manager can see the business (sale order) in the chosen time.

Each user can read the own user information and change password. If user can not remember password, they can click to forgot password on login form. They will add Staff ID and Staff email to system send password to email immediately.
